Assignment —3

Overview of SQL.

1) Does ANSI recognize the data type DATE?

Ans:- ANSI SQL recognizes the **DATE** data type. It is part of the standard SQL data types used to store **calendar dates** (year, month, day).

2) Which subdivision of SQL is used to insert values in tables?

Ans:- **DML — Data Manipulation Language**

The INSERT statement (used to add values to a table) belongs to **DML.**
